YOU WILL HAVE THE OPPORTUNITY TO TRANSFORM YOUR PRACTICE FOR THE BENEFIT OF YOUR STUDENTS, COMMUNITY AND INDUSTRY, AND TO CONTRIBUTE TO THE GROWING FIELD OF RESEARCH IN ARTS EDUCATION.

DEVELOP YOUR ARTS PRACTICE AND NURTURE THE NEXT GENERATION OF EMERGING ARTISTS

MA Arts Pedagogy and Practice students are concerned with developing their contemporary arts practice and nurturing future generations of emerging artists. Students come from a wide and varied range of creative and performing arts disciplines as well as visual, design, and curatorial practice. They are practicing artists and active educators who wish to integrate current arts pedagogy into their work.

For individuals who are deeply invested in nurturing and mentoring the next generation of emerging artists, the programme underscores the importance of developing a critical pedagogical approach. This programme develops your long-term capacity for exploration and openness to new and varied experiences that will support teaching in the arts in a constantly repositioning society and landscape. You will develop critical skills, self-awareness and reflexivity within your own perspective to become highly effective in supporting your growth as an artist working across diverse areas.

You will have the opportunity to transform your practice for the benefit of your students, community and industry as well as contribute to the growing field of research in arts education. The MA Arts Pedagogy and Practice Programme is structured to offer an educational development opportunity while enabling you to continue with your professional practice. LASALLE offers an interdisciplinary teaching and learning environment where experienced artists from vastly different backgrounds and interests are immersed in pedagogical discussion and research. The programme is designed to develop artists, practitioners, educators and researchers who wish to know more about educational theories, curriculum design, content delivery and assessment strategies. You will build upon your skills and knowledge and develop strategies to support students to break boundaries and create new contemporary work.
This full-time programme spans three consecutive semesters within a 15-year duration. Semesters 1 and 2 each have two 30-credit modules. In Semester 2, a 30-credit elective module option is made available to you with a choice to take the module offered by your respective programme or, in consultation with your Programme Leader, select a module offered by another MA programme. The 60-credit module in the final (3rd) semester will allow you to develop a thesis or a practice-based project/exhibition based on your research interests.

In the part-time mode, the programme spans six consecutive semesters within a three-year duration. You are required to complete one 30-credit module each in Semesters 1 to 4. The Final Research 60-credit module will span the last two semesters in the final year.

Part-time students will begin with the Research Methods in Creative Arts module as this establishes core principles and skills necessary across all MA programmes, while also introducing techniques of research, and enables you to present and write analytically and critically across relevant issues in your field of study. You will undergo academic guidance from your Programme Leader to organise your course of study.

**Research Methods in Creative Arts**

This module is an introduction to arts research through a thorough study of research methods and analytical techniques informing artistic and critical practices at the MA level. Research operates within a critical framework of understanding as two intersecting and complementary skill sets. Artists working in a wide variety of disciplines (music, dance, theatre, fine arts, film, media arts, design and more) and Community Artists working in a wide variety of contexts (with youth groups, seniors groups, corporate training), Arts Education Programmers and Directors working in a wide variety of professional contexts (museums, art galleries, performing arts companies), and Arts Education Consultants.

**Investigating Practice**

This module provides you with the opportunity to step back and reflect upon the basis of your pedagogical philosophy. Emphasis is given to critical reflection of your current pedagogy in relation to arts practice and to evaluating individual preferences in order to equip you with the capacity to articulate your position (approach, process, choice of content, outcomes, assessment) in a meaningful and informed manner.

**Experiencing Diverse Pedagogies**

Building upon the experiences obtained in the first semester, this module gives you the opportunity to look beyond yourself and your own arts pedagogy to examine how the arts is practiced and taught by others in your own discipline as well as other disciplines within your immediate circle of influence.

By givingyou the opportunity to witness, understand and appreciate a range of approaches and methodologies used by fellow arts educators within your discipline and from outside of your art form, you will gain a good understanding of the pedagogical capabilities already in existence within your community of practice, likely to be extended by your peers on the programme. Through this module, you will expand your expertise in your field through extensive reading, research, observation and creation of a collaborative, practice-based arts presentation with fellow cohort members.

**Transforming Practice**

You are advised to obtain Human Subject Research certification prior to the beginning of this module. An opportunity to achieve this certification will be provided throughout the first semester of the programme. In this module, you will conduct research proposed to and approved by your Programme Leader as well as complete your personal arts presentation. The purpose of this module is to engage you with new/other forms or processes in research to transform your arts practice and pedagogy. You will be involved in researching, applying and experimenting with one or more of the following: cross/trans/interdisciplinarity, cross/trans/intercultural practice, alternate pedagogy, other art forms to the practice, new media or technologies to the practice.

**Final Research**

In this module, you will engage in research on an aspect or aspects of education of particular interest to you. You will be advised by experienced researchers relating to the design of your research. Artists and educators within your community of practice will also provide you with differing perspectives to assist you in the development and delivery of your research project. The reflective practitioner approach will provide evidence of a growth in understanding of the pedagogical processes involved in the arts.

**POSTGRADUATE RESEARCH**

**LASALLE** has a long tradition of practice-led research in art and design. The College aims to assume a significant role in Singapore for practice-led research in visual, performing and literary arts, and aspires to add the distinctive viewpoint of Singapore to research into artistic practice in the 21st century.

The Research Methods in Creative Arts module is a common module which all students are required to undertake. You will have the opportunity to interact with one another in the first term (seven weeks), to network with peers in other MA programmes and to foster a stronger community of research practice that enhances your respective discipline of study as well as within the College.

You will be introduced to relevant professional methods of research and creation which may include profiles and/or dialogue with creative professionals, critical/theoretical discourses, action research, visual object analysis, textual analysis, case studies, historical and ethnographic research, interviews, lifestories/autobiographies, etc. You will also be introduced to research practices such as literature reviews, process-based discovery, bibliographical searches, quantitative & qualitative methods, citations and the construction of research questions.

Postgraduate students are constantly exposed to first-hand experience in current practices of research and creative practices leading to the development of powerful knowledge and of a wide set of skills by the time you graduate. You will have opportunities to develop expertise in accordance with your research interests.

By giving you the opportunity to witness, understand and appreciate a range of approaches and methodologies used by fellow arts educators within your discipline and from outside of your art form, you will gain a good understanding of the pedagogical capabilities already in existence within your community of practice, likely to be extended by your peers on the programme. Through this module, you will expand your expertise in your field through extensive reading, research, observation and creation of a collaborative, practice-based arts presentation with fellow cohort members.
