MASTER OF ARTS
DESIGN

MODE
Full-Time/ Part-Time
Classes will be conducted mostly in the evenings.

INTAKE
January

DURATION
Full-Time — 1.5 Years (3 Semesters)
Part-Time — 3 Years (6 Semesters)
What is the role of design and the designer in today’s fast-changing world? As technologies progress rapidly, so too the possibilities of what constitutes design. As societies grow, communities reimagine themselves and along with it, the designer’s canvas evolves. Not only do we create solutions, we also preserve the values and thinking behind them in response to constrained resources as diverse needs increase.

As design exists within an increasingly complex and interconnected world, we need to emphasise the social, environmental and downstream impact of designed products, services and systems. We will need to factor in not just market-driven forces and material possibilities, but what the making process itself means. This is why the practices of design and design research are increasingly important across industry contexts, whereby we rethink not only the makeup of the solutions, but also the process of inquiry that generates those solutions as well.

The complexity and unpredictability of the problems we face mean that solving them will require us to bring multidisciplinary skills, expertise and processes to bear on any one problem, as no one domain of expertise has the monopoly on the solution. As more individuals and organisations recognise this, designers today are applying their craft in a staggering variety of contexts – from products to services, organisations, systems and policies, beyond the previous conventional domains of design.

Against this backdrop, the MA Design Programme is designed to respond to the important role of design in re-imagining the world we live in. You will be challenging your thinking and making processes. You will emerge fully proficient in being able to articulate and produce design as a force for impact. You will be part of a new generation of research-based creators, innovators and inventors challenging conventions and creating well-informed positions of what design is, what it is able to do, and how it can help strategically transform lives.

The programme develops design research and practice capabilities in critical analysis, collaborative engagement and intellectual argument. You will learn by doing along the iterative process of research-led design practice. You will hone your critical thinking and ability to identify problems and formulate solutions, increasing your agility to perform across the roles of thinker, researcher, strategist and innovator.

We provide a learning environment for interdisciplinary and collaborative processes. You will explore research themes through modules on context, discourse, methodology and interdisciplinary design labs. You will experience active learning, dialogue and debate with your fellow students, faculty and industry partners with diverse backgrounds, expertise and experience.

In order to support your exploration of the emerging applications of design and where you can best apply your skills towards them, the programme provides a supportive environment full of advanced practical and research-driven opportunities for you to experiment across a wide range of domains.
PROGRAMME STRUCTURE

This full-time programme spans three consecutive semesters within a 15-year duration. Students will have the option to take the modules offered by your respective programme or, in consultation with your Programme Leader, select a module offered by another MA programme. The 60-credit module in the final (3rd) semester will allow you to develop a thesis or a practice-based project/exhibition based on your research interests.

**SEMESTER 1**

<tr>
<th>CREDIT POINTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Final Research</td>
</tr>
</tbody>
</table>

In the part-time mode, the programme spans six consecutive semesters within a three-year duration. You are required to complete one 30-credit module each in Semesters 1 to 4. The Final Research 60-credit module will span the last two semesters in the final year.

Part-time students will begin with the Research Methods in Creative Arts module as this establishes core principles and skills necessary across all MA programmes, while also introducing techniques of research, and enables you to present and write analytically and critically across relevant issues in your field of study. You will undergo academic guidance from your Programme Leader to organise your course of study.

Research Methods in Creative Arts

This module introduces you to arts research through a thorough study of research methods and analytical techniques informing artistic and critical practices at the MA level. Research operates within a critical context and this module aims to prepare you to confidently articulate your practice, formulate your own critical arguments and methods to investigate and probe issues.

Design Lab 1: Design in Context and Integrated Design Practice

In this module, you will develop your research and design project beyond the initial proposal stage through independent practical work, testing and critical analyses.

You will undertake a residency programme which will take place off-site during the June-July semester break. The focus of the residency programme is to provide you with a platform to test new ideas and engage in further research and scholarship within the creative industry and academic community.

Critical Discourse in Design

This module examines an interdisciplinary area of study discussing and analysing the theoretical foundations of design and the cognitive processes and methods used to explore, develop and communicate design solutions. You will be expected to question issues surrounding the nature of design, the processes guiding design, knowledge of design and theories developed from neighbouring disciplines that inform design.

Final Research

This module requires you to contextualise and present a substantial body of creative design work and/or written thesis, informed by the critical and conceptual thinking developed over the previous two semesters and supported by a research-led, critical discourse.

Postgraduate Research

LASALLE has a long tradition of practice-led research in art and design. The College aims to assume a significant role in Singapore for practice-led research in visual, performing and literary arts, and aspire to add the distinctive viewpoint of Singapore to research into artistic practice in the 21st century.

The Research Methods in Creative Arts module is a common module which all students are required to undertake. You will have the opportunity to interact with one another in the first term (seven weeks), to network with peers in other MA programmes and foster a stronger community of research practices that will enhance your respective discipline of study as well as within the College.

You will be introduced to relevant professional methods of research and creation which may include profiles of and/or dialogue with creative professionals, critical/theoretical discourses, action research, visual object analysis, textual analysis, case studies, historical and ethnographic research, interviews, life stories, autobiographies, etc. You will also be introduced to research practices such as literature reviews, process-based discovery, bibliographic searches, qualitative & quantitative methods, citations and the construction of research questions.

Postgraduate students are constantly exposed to first-hand experience in current practices of research and creation, leading to the acquiring powerful knowledge and a wide set of skills by the time you graduate. You will have opportunities to develop expertise in accordance with your research interests.

CAREER PATHS

The MA Design Programme at LASALLE builds upon the dynamically evolving design culture in Singapore and the region. As part of an increasingly important but scarce pool of talent, you will participate in the positioning of Singapore and Asia as a rigorous environment and connection point for innovative design-based education.

As a graduate of the programme, you will be sought after for your ability to understand the multi-faceted cultural, communicative, production, management and business demands so as to contribute across a spectrum of creative industries and business contexts.

**HIGHLIGHTS**

The programme focuses on helping you to develop a research-based design practice with developmental opportunities to stimulate interdisciplinary exchange. You will examine and contextualise analytical and critical approaches to design research methodology and formulate a design discourse in three broad areas:

- Research in design
- Research-based design
- Research through design

Through the programme modules, you will examine, critique and propose contemporary, emerging ideas through design practice using one or more of four research themes:

**CONTEMPORARY CITIES**

Design practices are now evolving through a set of values or symbols through which culture is constructed. This research theme focuses on how designers can transform everyday urban experiences and the worldliness of urban dwellers. We will explore how the contemporary city can be both local yet global, and how it encompasses complex economic, political, social, environmental factors at play. This theme gives you a critical vocabulary to create opportunities for dialogue between various social, technological, economic or political aspects influencing urban growth and development, to propose new ideas of how we will live in cities in the future.

**OBJECTS AND REPRESENTATION**

How individuals perceive and understand designed objects is socially and culturally dependent. The study of material culture has long been rooted in cultural and historical research. This theme focuses on designed objects and their various effects on the material culture of today so as to open up discussions on history, philosophy and the relationships between people, objects and representations. As design evolves, so does the value of objects. Thus, we will explore interesting interactions, narratives and relationships between people and their objects.

**CITIZEN DESIGNER**

Veronique Vienne (2009). It is about designers questioning how they can affect political or social change, what it means to be a social designer or be design critical against the fast-changing environments of Asia and beyond. This theme explores the impact of design on citizenship by raising issues existing in the minds of conscientious designers dealing with issues at the educational, individual, community and grassroots levels.

**FUTURE IDENTITIES**

The emerging design issues of today are typified by complex and interdependent problems. In the era of globalisation and growing digitalisation, the concept of design is blurring the lines between various social, technological, economic, political and environmental factors. This theme explores the issues concerning the future human society and the role of design in shaping our world. The focus of this theme is to explore how designers can engage in practice-led research to tackle critical design problems related to digitalisation, social changes, economic, political, social, environmental factors at play. Designers in this theme will examine and critique the role of design in shaping the future of society and how to approach design research in this context.

**HIGHLIGHTS**

The programme focuses on helping you to develop a research-based design practice with developmental opportunities to stimulate interdisciplinary exchange. You will examine and contextualise analytical and critical approaches to design research methodology and formulate a design discourse in three broad areas:

Nur Hidayah Bte Abu Bakar
DEAN, Faculty of Design & Active Programme Leader, MA Design
• MA (Design for Communication), University of Derby, Derby, UK
• BA (Design), Curtin University of Technology, Australia
• Diploma (Graphic Design), Nanyang Academy of Fine Arts, Singapore

Nur Hidayah is a design-educator engaged in furthering design thinking and its translation in Singapore and Southeast Asia. Her expertise lies in design curriculum branding and identity, design for communication strategies and advertising communication.

Prior to joining LASALLE, Nur Hidayah served in a full position of the design and communication systems ranging from capping, design and art direction projects across major industry segments. The coupled with her extensive teaching experience of more than 15 years, Nur Hidayah has been instrumental to the transformation of the Faculty of Design into a leading faculty for Southeast Asia.

A deep believer of the interconnectedness of design aesthetics, education and industry, Nur Hidayah has initiated several collaborative partnerships with various design institutions. She presented a research paper at the Ubuntu International Design Symposium 2011 in Seoul, which covered The Role of Design Education. With faculty staff members, she is currently developing design capability programmes with communities, in Asia and investigating issues around social enterprise for a more inclusive design culture. She has led the research and study of design cultures in contemporary Asian cities between Singapore, Seoul and Shanghai and undertaken the Global Design Initiatives involving five international universities looking at design as a research tool.

Over the years, her excellent interpersonal and management skills have enabled her to inspire many students. Her vision and foresight has helped nurture these students into professionals, endorsing their design and typography. Nadine started her academic career at Universiti Level, School of Design in 1997, while also pursuing her doctoral studies. She received her academic tenure in 2007 and led the University of Technology Undergraduate programme for one year before moving to Hong Kong in 2008.

In Hong Kong, Nadine continued her academic journey at the Hong Kong Polytechnic University as a visiting professor and full-time professor at the Hong Kong campus of the Savannah College of Art and Design. Apart from teaching undergraduate and graduate students, Nadine was also invited to participate in curriculum reconfiguration and school accreditation processes.

Nadine has been working internationally and her design practice revolves around clients in the cultural, governmental and educational sectors. She has worked for creative firms in Quebec City, New York, Paris, Porto and Hong Kong, as well as worked on design projects for clients such as金融危机, Arter Mark, Ballys, Centre Pompidou, New York, Toronto, Raffles, Sony, Microsoft, and Google.

Her design expertise ranges from designing prints (Books, catalogues, magazines and posters) and developing visual identities for creating in situ or digital experiences. Her latest research interest – the revival of traditions and historical sites through design – has emphasised work with designed objects, textiles experiments and urban installations.

In 2012, Nadine co-founded OR Atelier, an experimental graphic design studio, with Canadian designer Maxime Rheault. Their first project OR Play – a limited-edition collection of design objects exploring the value of play, their process and role in learning – was selected to be featured in The Brooklyn Beau-Arts National Museum to be featured in their design boutique. A short documentary on the duo’s creative process was presented at Radio-Canada’s broadcast television network.

Nadine’s design work has also won various professional awards and has been presented in international solo and group exhibitions in Canada, France, Poland, Japan and the USA.

Dr Harah Chon
LECTURER, MA Design
• PhD, The Hong Kong Polytechnic University, School of Design, Hong Kong
• MDes (Graphic Design), The Hong Kong Polytechnic University, Graduate School, Hong Kong
• BA, Parsons School of Design, The New School, US

Harah is a Korean-American design practitioner, researcher and educator. She is currently Lecturer-in-Charge for MA Design and teaches in the BA(Hons) Design Communication, BA(Hons) Fashion Design & Textiles and BA(Hons) Fashion Media & Industries Programmes.

Harah began her professional career in New York as a fashion designer at Ralph Lauren before pursuing postgraduate studies in Hong Kong. With a PhD in Design Epistemology Harah has investigated the ontological structures of knowledge representation to produce a culture-based theory of design knowledge. Her research methodology of her PhD thesis was published as a book chapter in The Routledge Companion to Design Research.

As a visiting researcher in the Department of Science of Design at Musashino Art University in Tokyo, Harah studies design metaphors through narratives and cultural epistemologies. Her current research activities focus on design theory and practice across the theory of collaborative design frameworks. Disruptive approaches to interaction and primary design methods can be cultural and knowledge transference. She advocates the furthering of discourses on design and cultural sustainability, social design and design knowledge.

Dr Nadine Ouellet
Programme Leader, MA Design in Communication
• PhD Equivalency (Visual Communication Design), University of British Columbia, Canada
• MFA Graphic Design, Yale University, US
• BFA (Visual Communication), Laval University, Canada

Dr Nadine Ouellet is an award-winning designer and educator, with expertise in visual methodologies, research and publication, innovation design and typography. Nadine started her academic career at Universiti Level, School of Design in 1997, while also pursuing her doctoral studies. She received her academic tenure in 2007 and led the University of Technology Undergraduate programme for one year before moving to Hong Kong in 2008.

In Hong Kong, Nadine continued her academic journey at the Hong Kong Polytechnic University as a visiting professor and full-time professor at the Hong Kong campus of the Savannah College of Art and Design. Apart from teaching undergraduate and graduate students, Nadine was also invited to participate in curriculum reconfiguration and school accreditation processes.

Nadine has been working internationally and her design practice revolves around clients in the cultural, governmental and educational sectors. She has worked for creative firms in Quebec City, New York, Paris, Porto and Hong Kong, as well as worked on design projects for clients such as金融危机, Arter Mark, Ballys, Centre Pompidou, New York, Toronto, Raffles, Sony, Microsoft, and Google.

Her design expertise ranges from designing prints (Books, catalogues, magazines and posters) and developing visual identities for creating in situ or digital experiences. Her latest research interest – the revival of traditions and historical sites through design – has emphasised work with designed objects, textiles experiments and urban installations.

In 2012, Nadine co-founded OR Atelier, an experimental graphic design studio, with Canadian designer Maxime Rheault. Their first project OR Play – a limited-edition collection of design objects exploring the value of play, their process and role in learning – was selected to be featured in The Brooklyn Beau-Arts National Museum to be featured in their design boutique. A short documentary on the duo’s creative process was presented at Radio-Canada’s broadcast television network.

Nadine’s design work has also won various professional awards and has been presented in international solo and group exhibitions in Canada, France, Poland, Japan and the USA.

Dr Mitha Budhyarto
LECTURER, Design Communication
• MA (Humanities and Cultural Studies), University of London, Birkbeck College, UK
• BA (Philosophy, Aesthetics), University of Sussex, UK
• BA (Philosophy and Art History), University of Surrey, Roehampton College, UK

Mitha is responsible for developing and implementing a joint project for the different programmes within the Faculty of Design – with a focus on Southeast Asian Design Studies.

Mitha is also a lecturer for BA(Hons) Product Design Level 3 students who are working on their graduation thesis. She is responsible for BA(Hons) Fine Arts. Level 2 tutorials on Art Theory. Alongside her academic position, she continues to maintain her practice as a curator.

Dr Andreas Schlegel
LECTURER, Design Communication
• MA (European Media), University of Portsmouth, UK
• MSc (Media Arts & Technology), University of California, USA

Andreas Schlegel is a lecturer, curator and independent scholar based in Singapore. He is also a practicing artist who has exhibited his individual and collaborative works internationally. His works have been shown at ISG (Nagoya, Japan, 2002; Singapore, 2008), Ditectic (Tokyo, Japan, 2007), ARCO (Madrid, Spain, 2006) and SPOMDA (San Francisco, US, 2002).

Andreas currently heads LASALLE’s Media Lab. After graduating from Metz Akademie Stuttgart (Germany) with a Diploma in Communication Design, he went on to obtain a MA from the University of Portsmouth (United Kingdom) in 2000 and a MSc at the University of California, Santa Barbara (USA) in 2004.

Andreas is also the co-founder of the art collective symphorium, where many of his collaborative projects are based. He stays active within the international media arts environment and regularly develops design projects for the open source community “processing.org”.

With a background in Design and Media Arts, his artistic practice focuses on using new technologies to push new forms of expression. His research explores the potential of computational and generative processes, physical computing and human-computer interactions, i.e. the study of interaction between people and computers, in artistic and everyday life situations.

Andreas has several years of experience in the creative industries in Germany. He is also a practicing artist who has exhibited his individual and collaborative works internationally. His works have been shown at ISG (Nagoya, Japan, 2002; Singapore, 2008), Ditectic (Tokyo, Japan, 2007), ARCO (Madrid, Spain, 2006) and SPOMDA (San Francisco, US, 2002).

Entry Requirements

• A good undergraduate degree (equivalent to a 2nd class honours classification) in any related discipline from a recognised tertiary institution.
• Experience with relevant and substantial creative work (written or visual form).
• Preferred professional work experience either in full-time or part-time capacity or any other substantial related work experience.
• A satisfactory score in written and spoken English OR a minimum of IELTS 7.0, TOEFL IBT 100 or PTE Academic 65 for applicants from countries where English is not the first language or whose qualifications are obtained from institutions where English is not the medium of instruction.
• Applicants who come from non-design fields but with the interest and relevant background to develop research work in related fields can apply as well. Applicants are selected on the basis of their research proposal and interest in design.
• Applicants should have sufficient technical skills to realise intentions and show evidence of commitment to the study.

All applicants will have to submit a research proposal and will attend an interview to discuss their application. The applicant must outline their interest in design and how they wish to push the boundaries of design in related or non-related domains.

The written research proposal should consist of the intended design research enquiry and a brief study plan (1,000-1,500 words).

The proposal should include:
• A brief background research including contextual framing and design.
• Any visual examples as reference.
• Bibliography.

Entry Requirements
ABOUT LASALLE COLLEGE OF THE ARTS

Asia’s leading tertiary institution in contemporary arts and design education and practice.

LASALLE College of the Arts offers 30 diploma, undergraduate and postgraduate programmes in fine arts, design communication, interior design, product design, film, animation, fashion, dance, music, theatre, arts management, arts pedagogy and practice, art therapy, Asian art histories and creative writing.

LASALLE provides a nurturing, interdisciplinary learning environment to inspire the next generation of forward-looking, globally engaged artists, designers and leaders of creative industries.

Its faculty is led by a community of award-winning artists, designers, educators and researchers, and their practice-led research sets LASALLE apart as an international centre of excellence.

Founded in 1984 by the late De La Salle Brother Joseph McNally – a visionary artist and educator – LASALLE is a non-profit private educational institution. The College receives tuition grant support from Singapore’s Ministry of Education. Its degree programmes are validated by Goldsmiths, University of London.
