Statement of culture

LASALLE promotes the significance of the arts to effect personal, social and economic transformations. An empowering and dynamic environment inspires ambitious aspirations for staff and students, and the development of high-level skills, creativity and critical reflection.

Contemporary focus

With an emphasis on contemporary practice and research, our teaching philosophy emphasises idea generation and new interpretations of creative disciplines. Our students' ideas and creativity set them apart as they emerge as reflective practitioners in the industry. As an Asian institution positioned at the crossroads of diverse cultures, an arts education at LASALLE brings students closer to developing a deep understanding of cultural and artistic links between the East and the West.

Practice-led arts education

The professional practice of LASALLE's teaching staff is one of its most important assets. Our unique College environment is formed by a faculty of accomplished artists and educators from around the world, many of whom are renowned experts in their areas, actively involved in exhibitions, performances and research. The incorporation of their respective expertise in programme delivery closely relates teaching and learning to a broad range of theoretical and intellectual concerns in contemporary arts and design practice.

Students are constantly exposed to first-hand experience in current research practices, leading to the acquiring of a wide set of knowledge and skills by the time they graduate. These skills enable them to successfully adjust to the multi-faceted demands of the creative industries.

Specialist mentors

Students are mentored by an international and Singaporean faculty who spans a breadth of creative professions in art, design, media and performance. From artists, actors, composers, dancers, designers, directors, curators, multi- and interdisciplinary artists to many more, they collectively represent an international career portfolio with some of the most forward looking institutions and organisations in Singapore and globally.

Journey to excellence

In 2015, LASALLE became the first home-grown Singaporean institution to be awarded the coveted EduTrust Star by the Committee for Private Education, the highest accolade of quality for a private education institution in Singapore. The College was awarded a second consecutive EduTrust Star in 2019, affirming its ongoing commitment to quality education.

In 2021, LASALLE is ranked within the top 151-200 institutions globally for art and design (QS World University Rankings 2021). It is set to become part of Singapore's new university of the arts, which is currently under development.

Partner institution

Goldsmiths, University of London, a partner institution of LASALLE, is renowned for having a creative and innovative approach to the teaching of and research in the arts. Goldsmiths has approved LASALLE as an appropriate tertiary institution in Singapore to offer degree programmes leading to Goldsmiths validated awards.

All degree programmes offered at LASALLE have been designed and developed by LASALLE to fulfil the needs of the creative industries in Singapore and beyond. These programmes have been validated through a process of external peer review by Goldsmiths as being of an appropriate standard and quality to lead to a Goldsmiths award.

Government support

As part of the government's plans to upgrade arts education in Singapore, LASALLE is a recipient of financial support from Ministry of Education (MOE) for both Diploma and Bachelor of Arts (Hons) programmes. Eligible students are entitled to subsidised fees through the MOE Tuition Grant Scheme.

Constitution

As a private, non-profit arts institution, LASALLE is a registered Institute of a Public Character, approved by the Commissioner of Charities, and operates autonomously under the constitution of LASALLE College of the Arts Limited.

Situated in the central civic and cultural district of Singapore, the McNally Campus is designed to optimise interaction and provide line of sight across the community through its glass façade and gateless walls. The design provides many platforms for interaction and inspiration. In keeping with the integrative nature of contemporary arts and design practice, multiple breakout spaces and sky bridges encourage diverse art forms to coalesce and co-mingle, providing an inspiring learning environment for students.

Architecturally iconic and designed to enable a vibrant, connected community, the McNally Campus offers students an impressive array of performance and exhibition spaces for learning and showcasing. Core lectures and teaching programmes take place at the McNally Campus where LASALLE's unique learning environment encourages interdisciplinary interaction and a holistic approach to contemporary practice.

The Ngee Ann Kongsi Library

LASALLE's Institute of Contemporary Arts Singapore

The Institute of Contemporary Arts Singapore (ICAS) is the curatorial division of LASALLE College of the Arts. Situated at the College's dynamic city campus, its five galleries present a programme of curated international exhibitions alongside exhibitions organised with students, academic staff and alumni.

ICAS provides curatorial expertise and resources in the areas of exhibition development, display and mediation, publishing and education as well as manages the LASALLE College of the Arts Collection.

Theatres

For teaching and learning purposes, LASALLE houses the Singapore Airlines Theatre and two other black boxes. These spaces are also popular with external hirers to stage major theatre festivals and performances during semester breaks.

Winstedt Campus

The Winstedt Campus supports continuous innovation and excellence by supporting studio-based work and research. The space is designed as a comprehensive creative centre that visual arts students – in particular those involved in studio-based modules and levels – can utilise ample and appropriate spaces to develop and complete their semester projects, especially when some of these works might be larger in scale and ambition.

THE WIN-WIN FACTOR

BRINGING OUT THE BEST IN OUR STUDENTS

Beyond just learning how to be the best arts and creative industry practitioners during your time at LASALLE, the practice-based pedagogy also promotes experiential learning and participation in competitions on a regional level. This inculcates a sense of real-life experience that will hold you in good stead once you step into the environment of contributing to the economy at large.

Assistant art conservator and restorer, museum gallery assistant, graphic novel artist, model and prop maker, painter, printmaker, photographer, sculptor, videographer, graphic designer, assistant trainer in visual art, assistant art teacher/educator, window display artist, layout artist or exhibition designer.

OVERVIEW

The process of art making demands the acquisition and development of strong knowledge and skills in materials, accompanied by a reflexive understanding of this knowledge that is then continually tested and extended through relevant practical application.

Steered by this belief, the teaching and learning approach for the programme is grounded primarily on a practice-based methodology, with an emphasis on the development of your creative processes and discoveries that are honed by community engagement projects and a strong understanding in art history and ideas. You will be trained and equipped with the specific skills, techniques, aesthetics and knowledge of historical issues associated with your discipline.

The programme will provide you with the exposure to various fine arts media such as painting, printmaking, sculpture, graphic novel and lens-based art. You will be given the opportunity to present your final project in your specialised area through a self-proposed brief. The programme also emphasises an interdisciplinary approach to learning, which allows you to discover and establish cross-discipline methodologies in the development of your works. As it is the preliminary stage of your artistic journey, we consider this programme as crucial to allow you to search for a unique creative voice and understand the use of materials and art processes confidently so that you can hone these skills at a higher level.

CAREER PATHS

Concert musician, studio musician, singer, songwriter, composer/arranger or product specialist, producer, music reviewer, voice talent or vocal coach.

OVERVIEW

Contemporary in focus, the Diploma in Music teaches music that is relevant and valued in today's culture. This hands-on programme prepares you for entry into the contemporary music industry in Singapore and the region. Over three years, you will develop instrumental or vocal technique, study music theory, sight-reading and aural training, and receive regular performance opportunities.

The goal of the programme is to develop you as a well-rounded 'session musician', able to sight read, perform a broad range of repertoire, and respond confidently to various professional music situations.

A typical week involves you rehearsing and performing in a number of different ensembles, receiving small-group lessons on your chosen instrument or voice, studying aural and theory of music, learning about the history of music, and being mentored by some of the most experienced musicians and educators in the region.

The programme also provides opportunities for you to perform in studios and performance venues to help develop your individual stage presence – a crucial factor in becoming a successful performing musician.

To prepare you for entry into the music industry, the syllabus and assessments are benchmarked with industry standards. Through a progressive structure of modules and assessments, you will be taken step-by-step through the building blocks of musicianship and performance to become a confident member of the entertainment industry.

The course will also involve community engagement, playing to the wider public and, where possible, industry internships.

ADMISSIONS

To determine your suitability for the programme, you will need to submit an audition recording to help us understand your technical and musical abilities.

AUDITION RECORDING

You will need to submit a video recording of three contrasting pieces of music in any style that will demonstrate your technical and musical abilities most effectively.

Three contrasting pieces may refer to different tempos (e.g. ballad, medium tempo, fast tempo), different styles (e.g. pop, jazz, funk), different genres in one style (e.g. rock ballad, rock-pop, hard rock), different meters (e.g. 4/4, 3/4, 6/8), different periods (e.g. Baroque, Classical, Romantic), or any characteristic that renders the pieces contrasting.

In your video(s), you must perform each of the three pieces in its entirety, not just sections.

- For voice auditions, vocal recordings must have an accompaniment. You can either sing your tunes with a backing track, sing on top of the original recording, or you can accompany yourself with a guitar or piano or another musician can accompany you. You must not perform or submit an a cappella (without accompaniment) vocal recording.
- For instrumental auditions, you can either perform your tunes with a backing track or on top of the original recording. Only guitarists and pianists can record one solo piece, as long as it is a solo piece arrangement. For classical pianists, each movement will be considered as one piece in case of performing a multi-movement work.

Your video recordings must clearly show your face, and in the case of instrumentalists, you must also show your hands while playing as best as possible. Please refrain from using any special effects or filters that might blur your face or hands or submitting social media videos (like TikTok).

ADDITIONAL REQUIREMENT

Previous qualifications in music theory or practical exams are preferred but not a requirement for entry into the programme as you will be judged solely on the quality of your submitted audition recordings.

However, you are required to complete an online music theory and aural test set by the School of Contemporary Music. You will be notified of the date and time.

If we wish to know more about your audition recording, we will arrange for a discussion with you.

OVERVIEW

Film may resemble so many other art forms, however it is in itself a unique medium. Film prizes the collaborative process and the programme sits in a privileged position of being able to tap into the ecosystem of the various disciplines of an arts college. While doing so, the primary focus of the programme is to nurture its students to find their own voice through the art of cinematic storytelling.

This programme answers the call of the local and international film communities, which seek reflective practitioners empowered by creativity and authenticity. Through practice-based learning instilled with critical thinking, you will be inspired to communicate within a cinematic framework and explore various narrative environments, such as short and feature films, documentaries and television commercials, with an emphasis on professional and broadcast standards.

While keeping with the current advances in technology, the programme also observes that these are mere tools in the overall architecture of content. Although new technologies always have and will continue to have an impact on the realisation of artistic works, the programme emphasises skills and knowledge that refer to the artistic and conceptual traditions in film, especially in the area of storytelling and all film-related disciplines – from screenwriting, directing and producing to cinematography, sound, editing and production design.

CAREER PATHS

Interior designer or design consultant, design educator, furniture designer, exhibition designer or stage designer.

OVERVIEW

Interior design is defined as the act of creating environments within and around existing spaces and structures. As a profession, it covers the design and planning of an immense range of places including, but not limited to domestic, leisure, retail, office, healthcare, hospitality, and institutional spaces. It is also closely interwoven with various design disciplines like architecture and industrial design.

Interior design is not a course on interior decoration, nor is it the pursuit of architecture under the guise of interior design. You will focus on the creation of experiential environments from the perspective of users, and the discovery of new typologies of space. You will look to the conceptual to challenge convention, habits and trends, and seek to explore the controversial, unexpected, and emergent, with the onus on critical design thinking and intense involvement in the design process.

The curriculum is based on a number of key design principles. Design processes and conceptual thinking methodologies are explored in a practice-based studio environment and supported with core discipline skills that involve a critical understanding of design history and contemporary theory, technical knowledge on building materials and technology, traditional drafting and modelling techniques, as well as the latest in computer-aided drawing and visualisation. Through the course of study, you will be exposed to the demands of the profession with a continuous engagement in local and international design competitions, live project and exhibitions.

The objective is to create an ecosystem of significant designers who display a restless curiosity and make informed design decisions.

CAREER PATHS

Product designer, design manager/director, industrial designer, design and technology educator, product design researcher, digital asset designer, trends and futures specialist, furniture designer or lighting designer, packaging designer, events/interior designer, model and visualisation specialist or product marketing specialist.

OVERVIEW

Product design is about people, process, method and meaning. The programme moves away from the traditional notions of the practice where product/industrial designers are seen as form-givers and crafts people of the highest order in Asia, to a realm where the product designer creates from a keen awareness of social, cultural, economic and environmental sensitivities, with a key focus on human behaviour and user experience.

The pedagogy engages design practice through contextual underpinnings linking theory to practice: an awareness of the issues pertinent to contemporary design is emphasised and reflected incrementally through various levels of learning.

It is an immersive programme of thinking through making in a studio-based environment. This is realised through a strong emphasis on user research, technical understanding and criticality. You will be challenged to work within or even define design projects briefs with diverse starting points to conceive innovative products, services and research across contexts and cultures.

This critical experimentation is tempered with a good knowledge and understanding of significant developments in design history and theory as well as core discipline knowledge in materials science, manufacturing technology and mass production. You will also be trained to a high level of proficiency in 2D/3D manual and digital, integral to the reflexive practicing designer.

OVERVIEW

The world of musical theatre is diverse and colourful – with new musical works being brought alive everywhere by performers, directors, choreographers, designers and musicians.

PRIVATE EDUCATION ACT

The Committee for Private Education (CPE) was appointed by SkillsFuture Singapore (SSG) Board in October 2016 to carry out its functions and powers relating to private education under the Private Education Act. The CPE is supported by a team of dedicated staff from SSG to regulate the sector, provide student services, consumer education and facilitate capability development efforts to uplift standards in the local private education industry.

STUDENT CONTRACT

LASALLE adopts the Committee for Private Education (CPE) standard PEI-Student Contract. You can refer to the SSG website for more information on the Student Contract.

As part of the enhancement of the Singapore private educational landscape, the Singapore Private Education Act stipulates that all private educational institutions must sign a student contract with students enrolled.

More information can be found at www.ssg.gov.sg/cpe/pei.html.

To accept the offer for admission, students are required to complete and return signed copies of the LASALLE-Student Contract in order to be enrolled with the College.

REFUND DURING COOLING-OFF PERIOD

The PEI will provide the Student with a cooling-off period of seven (7) working days after the date that the Contract has been signed by both parties.

The Student will be refunded the highest percentage (stated in Schedule D) of the fees already paid if the Student submits a written notice of withdrawal to the PEI within the cooling-off period, regardless of whether the Student has started the course or not.

PROGRAMME WITHDRAWAL

New students who wish to withdraw from their programme of study after an acceptance of offer but before programme commencement are required to notify the College via an email indicating their intention to withdraw to the Admissions Office. Should the notice of withdrawal fall within the cooling-off period of seven working days from signing the student contract, the Maximum Refund as stipulated in the contract applies. Otherwise, the College's refund policy will apply.

Students withdrawing after programme commencement are required to submit relevant withdrawal forms and seek approval from the College in accordance with the College's withdrawal procedures (details are available on the College's Learning Portal). For international students, the student's pass will be cancelled upon approval. Any refunds will be processed in accordance with the College's refund policy.

PROGRAMME TRANSFER

Transferring from a programme to another is deemed as a withdrawal from the current programme.

New students who have accepted an offer in a programme but wish to change programme prior to the programme commencement date are required to notify the College and re-apply for admission into the new programme.

FEE PROTECTION SCHEME (FPS)

FPS serves to protect students' fees in the event a PEI is unable to continue operations due to insolvency, and/or regulatory closure. The FPS also protects students when the PEI fails to pay penalties or refund fees to the students arising from judgments made against it by the Singapore courts.

As an EduTrust-certified PEI, LASALLE is required to adopt the FPS to ensure full protection to all fees paid by their students. Therefore, the FPS is compulsory for ALL local and international students who are taking Bachelor of Arts (Hons), Master of Arts and English programmes at LASALLE. Diploma programmes offered by LASALLE are funded by MOE and therefore all fees are exempted from the Student FPS under the EduTrust requirements of the CPE. For more information on FPS, please refer to www.lasalle.edu.sg.

The Student should be informed in writing of alternative study arrangements (if any), and also be entitled to a refund of the entire Course Fees and Miscellaneous Fees already paid should the Student decide to withdraw, within seven (7) working days of the above notice.
